- HTML5,CSS3,JavaScript (ES6+)
- React.js
- Tailwind CSS / Bootstrap
- TypeScript
- Chainlit

Backend Development:

- Node.js / Express.js
- Java / Spring Boot

Database Management:

- MySQL
- MongoDB

PROFILE

Full Stack Developer with strong expertise in React.js, Node.js, and MongoDB. Experienced in building responsive, user-friendly web applications and integrating RESTful APIs. Skilled in both frontend and backend development with a focus on clean, efficient code. Passionate about problem-solving, learning new technologies, and contributing to high-impact, scalable software solutions in collaborative environments.

EXPERIENCE

LEARN AND BUILD • MAY 2023 – JULY 2023

MERN DEVELOPER – Jaipur, Rajasthan

Completed a MERN Stack Developer program at **Learn and Build**, where I developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Gained hands-on experience in building responsive UIs, creating RESTful APIs, implementing JWT-based authentication, and managing state with React Hooks. Collaborated on real-world projects using Git and agile development practices.

TECHNOSTERS PVT. LTD • AUG 2024 - FEB 2025

FULLSTACK DEVELOPER- Agra, Uttar Pradesh

Worked as a **Full Stack Developer** at **Technosters Pvt. Ltd.**, where I was involved in designing, developing, and deploying multiple client-facing web applications. Key projects included a **charity management website** and a feature-rich **e-commerce platform**, both built using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**. I was responsible for building responsive and user-friendly interfaces, implementing core backend logic, and managing secure user authentication systems. I developed donation tracking modules, product listings, shopping carts, and integrated third-party **payment gateways** for smooth transaction flows. I collaborated closely with cross-functional teams in an **agile environment**, used **Git** for version control, and ensured code quality and scalability through structured development practices. This experience strengthened my full stack development skills and real-world problem-solving abilities.

HULK HIRE • Open Project

Java Developer – Telangana, Hyderabad

Currently working as a **Java Developer**, focusing on the development and integration of secure and scalable **payment gateway solutions**. Responsible for implementing backend logic using **Java, Spring Boot**, and RESTful APIs to enable smooth and reliable transactions. Involved in API integration with third-party payment providers, ensuring data encryption, transaction logging, and error handling. Collaborating with cross-functional teams to optimize performance and maintain high security standards throughout the payment lifecycle.

PROJECTS

1. Responsive Charity Website

Role: Full Stack Developer

Developed a fully responsive website for a non-profit organization using the MERN stack. Implemented donation tracking, user authentication, and admin dashboard. Ensured mobile-friendly UI with Tailwind CSS and deployed via Vercel.

2. E-Commerce Website

Role: Full Stack Developer

Built a scalable e-commerce platform with product listing, cart functionality, user login, and secure checkout. Used React.js for frontend and Node.js/Express with MongoDB on the backend. Integrated payment gateway and managed user sessions securely.

3. A.I. Shopping Assistant (Final Year Project)

Role: Frontend Developer

Designed the user interface for an AI-powered shopping assistant using React.js, Next.js, and Tailwind CSS. Integrated chatbot UI (Chainlit) and product recommendation modules. Collaborated with backend and UI/UX teams to ensure seamless interaction.

4. Payment Integration Module

Role: Java Developer

Worked on backend integration of third-party payment gateways using Java and Spring Boot. Handled secure API communication, transaction logging, error handling, and response validation to support seamless online payments.
